

## REPUBLIC OF TÜRKİYE TURKISH STATISTICAL INSTITUTE

### PUBLIC ANNOUNCEMENT

Date: 01.12.2025

### Monthly Birth and Death Figures for the Current Year

Türkiye is rapidly losing its population's ability to replace itself, driven by a sharp and continuous decline in the fertility rates over the last decade. Therefore, up-to-date data to guide population policies for our country is needed more than ever.

To address this need, TurkStat has completed the studies on producing monthly birth and death statistics for the current year, which are published annually using administrative registers.

The number of births decreased by 8.3% in the first seven months of 2025 compared to the same period of the previous year, reaching 503 thousand 765. The number of deaths increased by 0.7% during the same period, reaching 294 thousand 824.

Access to the tables is possible via the links below.
